

Paragon Machine Works Production

Do you do prototype work? No.
Are you able to modify existing products? No.
What is your shop rate? \$100/hr.

Quotes

- Creating a quote is time consuming and requires thoughtful analysis. It includes costs for design, programming, set-up, materials, and labor. It is not uncommon for the initial design phase to cost upwards of \$1000, even if it is "similar" to another part that we make. *Please request a quote only if you feel you have a viable product that it is worth the financial investment.*
- Minimum order quantities apply, 25 or more pieces is generally a reasonable starting number. Up to a certain point, the greater the quantity the cheaper the price will be.
- If we are unable to accommodate your production needs, it is not a reflection on the worthiness of your project.

Required Information

- Send a dimensioned and tolerance .dxf or 3D CAD file to [orders\(at\)paragonmachineworks.com](mailto:orders(at)paragonmachineworks.com). We can create a drawing for you but it will add to the expense of your project.
- Production quantities.
- Type of material.
- Date that you need your product (we generally need a 4 - 6 week lead time).

Acceptance of Quote

- Provide written confirmation or a email a purchase order to orders@paragonmachineworks.com.
- A 50% deposit is required prior to ordering material and start of production, with the remainder is due upon shipment/delivery/pick-up.
- We do not provide samples.
- We guarantee that the finished product will match the specifications of your drawing.
- We will re-make your product or refund your money if there is a production error.
